Sprint 1 Report
JamCircle
Team JamCircleDevs
January 30, 2024

Actions to STOP Doing:

- Stop waiting to schedule meetings

     Currently, we tend to schedule meetings the day before or the day of which usually ends up causing a chain of "I can't make it" until we shuffle the time around enough to meet together. Instead, we want to try and schedule meetings at the start of each week

- Working on the same things

     Throughout the sprint, we had some cases of finding out that two people were working on the same or similar tasks. While collaborating is good for our project these instances were unplanned which leads to wasted work when we could have been working on more tasks.

Actions to START Doing:

- Documenting More

     As our codebase is growing it is getting more complex to understand what everything is doing. Documentation was always in mind when thinking about our development environment but we haven't been great at keeping up with it. We want to start heavily documenting our code, possibly by creating a wiki or at least a README.md in each directory explaining the files within

- Stay in the loop

     Concerning the issue of duplicate work being done we know that we need to improve our communication with each other. A simple start to this is adding more dedicated channels within the team discord so necessary info can be easily identified. (ex. Creating "Frontend" and "Backend" text channels). Moreover, we want to make sure each task is assigned a name as it is being worked on.

- Strictly following scrum meeting formula
  Throughout the sprint, our scrum meetings tended to devolve into asking about how things are getting done at more of an implementation level rather than focusing on what has been/is getting done. Moving forward our scrum meetings will strictly focus on the main 3 talking points for each member.

Actions to KEEP Doing:
- Working together
  We had many instances where we collaborated on certain tasks rather than splitting it all into individual work. A good example of this was in the development of the frontend UI and deployment

- Getting work done
  We did not have many issues in getting work done in a certain timeframe so we plan to keep working diligently throughout each sprint moving forward

Work Completed/Not Completed
Completed
- *"As a user, I want easier integration between Spotify and Jam Circle so I don't need multiple accounts"*

- *"As a user, I want a profile page so that I can have more detailed stats based on my Spotify listening."*

Not Completed
- *"As a user, I want to have a place to view all my Spotify friends so that I can see their stats "*
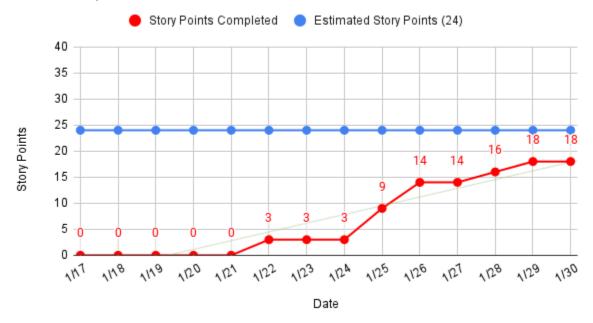

Work Completion Rate

User Stories Completed:	2
Estimated Ideal Work Hours (Story Points):	24
Number of Days in Sprint:	14
User Stories Per Day:	0.22 *(counting past 1/21*)*
Ideal Work Hours Per Day:	2 *(counting past 1/21*)*

    * Counting past 1/21 since days prior were only spent on learning spikes and no development was being done. range is 9 days
